

HERS Residential Energy Code discussion

Glastonbury Abbey
Thursday, September 26th

8:30-11:30

8:30-9:45AM Residential Existing Buildings

Presented by: Bill Footer of Mass Save

- There has been confusion as to when the new energy code requires HERS ratings on Residential renovations, alterations, repairs and additions.
- This course will provide an overview of the new requirements for existing residential buildings.
- We will cover several of the most common types of existing home projects and describe the applicability of the most important energy code provisions.

10:00-11:15AM Managing Condensation & Thermal Performance

Presented by: Andy Collins of Huber Engineered Wood

- Best practices when building with continuous insulation
- Discussion will focus on Zip R Installation
- Discuss challenges builders face with the HERS rating and ways to overcome.
